PROFILE

Driven by a passion for innovation, knowledge and excellence I have dedicated several years to refining my expertise in marketing and web design. My journey has been marked by a relentless pursuit of knowledge and an unwavering commitment to delivering results. With a robust portfolio of successful marketing campaigns and web projects, my focus now sharpens toward self mastering web development.
I take pride in my proven ability to devise and implement strategies that resonate with audiences and create memorable user experiences. From formerly creating brands and advertising, this has given me the experience to capitalize on my UI/UX design. My professional ethos is built on a foundation of precision and an insatiable appetite for learning.

EXPERIENCE

Fullstack Shopify Developer   **ECODE**   NY, Remote   **Jan 2024 - Current**

- Helping lead the transformation of a startup's branding by creating a bespoke theme using React.
- Seamlessly implemented this custom theme within the Shopify platform.
- Employed innovative tools like TypeScript to elevate the project's effectiveness and dependability.

Frontend Developer, Contract   **Love2Communicate LLC**   Freehold, NJ   **Aug 2023 - Nov 2023**

- Spearheaded the full-scale development of Love2Communicate LLC's online presence, a client-centric speech therapy business platform, emphasizing seamless user interaction and service exploration.
- Led the design of the website's front-end architecture using React, crafting a responsive interface that adapts fluidly to mobile and desktop devices, thus ensuring accessibility for all users.
- Orchestrated the implementation of a client-facing platform using HTML, SCSS, and JavaScript, enhancing the user journey through intuitive navigation and engagement with the service offerings.
- Re-branded the company logo and website, full management from creation to deployment, code review, debugging

Jr Frontend Developer, Contract   **MaCuDE LLC**   Hoboken, NJ   **Oct 2022 - Feb 2023**

- I played a pivotal role in significant front-end optimization initiatives, meticulously refactoring HTML, CSS, Bootstrap, and jQuery to elevate sitefunctionality and performance. My contributions have included the strategic redesign of website sections to augment aesthetics and user engagement.
- Collaborating closely with the Chief Technology Officer, I have been instrumental in the ideation and execution of front-end designs
- Redesigned Navbar • Incorporated major UI updates on participants page • Debugged Events carousel • Updated Footer UI

PROJECTS

Frontend Developer, Project   **Vinchy Exclusives***   **Nov 2023 - Jan 2024**

- Designed and created a dynamic clothing brand, including a responsive interface utilizing Next.js, ensuring an engaging and eye-catching UI
- Incorporated smooth animation using vectors and keyframes for brand identity and user interface
- Connected the front end to a Postgres backend database to ensure smooth scalability
- Engineered a streamlined cataloging system by designing and cataloging a comprehensive collection of clothing articles. I optimized the digital inventory by integrating it into a JSON file, significantly enhancing data retrieval speed and reducing website load times.

Fullstack Developer, Project   **Dream Stay**   **June 2023 - Aug 2023**

- Solely architected and coded an Airbnb clone platform, Dreamstay, from the ground up, utilizing a modern tech stack that includes React, SCSS, and MongoDB.
- Constructed a user-friendly client-side interface with HTML, CSS, and JavaScript, achieving an intuitive navigation and an aesthetically pleasing user experience reminiscent of industry leaders.
- Implemented JavaScript extensively across both server and client sides, enhancing all listing data interactions and optimizing website load times for peak performance.
- Designed a robust personal database for the storage and management of home listings, ensuring data consistency and reliability.
- Integrated the platform with MongoDB Atlas, leveraging the cloud database service for improved scalability and accessibility.
- Managed full stack development activities using a suite of technologies including Node.js, React, Express.js, along with Request and HTTPS modules to ensure a secure and efficient web environment.

Fullstack Developer, Project   **Block Bank**   **April 2023 - June 2023**

- Engineered Block Bank's core infrastructure, a live cryptocurrency price tracking platform, to deliver real-time financial data to users
- Designed and implemented a dynamic, responsive user interface utilizing React, ensuring an engaging and seamless experience with live cryptocurrency market updates.
- Devised a secure backend system for API Key Management, integrating with CoinGecko's API to safeguard sensitive data against unauthorized access and ensure robust data integrity.
- Orchestrated advanced data handling mechanisms using JavaScript, enabling the processing and smooth flow of high-frequency data updates essential for accurate real-time financial reporting.

EDUCATION

Bachelor of Science (3.2)	**Montclair State University**	*Little Falls, NJ, USA*	**Sep 2014 - Jan 2019**
Python Programming Certification	**Meta**	*Coursera*	**Nov 2023 - Feb 2024**

Courses: The Complete Web Development Bootcamp, Next.js & React - The Complete Guide, SASS & CSS Course, Object-Oriented Programming, Python Bootcamp
